ROHITH R GOWDA

Java Full Stack Developer

Bengaluru, India | 8971487731 | rohithrgowda23@gmail.com | linkedin.com/in/rohithrgowda | github.com/Rohithrgowda23

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience in building full-stack applications using Java, Spring Boot, REST APIs, Microservices, React.js, and MySQL. Strong knowledge of Core Java, OOP, Collections, Streams, JDBC, JPA/Hibernate, Spring Security, JWT, and SQL. Experienced in developing secure APIs, implementing authentication, database operations, and integrating frontend applications with backend services. Familiar with Apache Kafka, Redis, Docker, JUnit, and Mockito. B.E. Computer Science graduate seeking Java Developer / Java Full Stack Developer opportunities in Bengaluru.

TECHNICAL SKILLS

Backend: Java, Spring Boot, REST APIs, JDBC, JPA/Hibernate, Spring Security (JWT, OAuth 2.0), Microservices, Servlets, Apache Kafka

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, Tailwind CSS

Database: MySQL, SQL Server, Redis, Database Design, Query Optimization, CRUD Operations

AI & Generative AI: LLMs, Prompt Engineering, RAG, Semantic Search, Vector Databases, Spring AI, AI Chatbots

Tools & DevOps: Git, GitHub, Postman, Maven, Docker, VS Code, IntelliJ IDEA, CI/CD

Core Concepts: Data Structures & Algorithms, SDLC, API Design, Debugging, JUnit, Mockito

PROFESSIONAL EXPERIENCE

Advanced Java Full Stack Trainee — Besant Technologies (E&ICT Academy)

- Completed intensive, hands-on training in Advanced Java, JDBC, Servlets, Spring Boot, React.js, HTML, CSS, JavaScript, and MySQL.
- Built multiple scalable full-stack applications integrating frontend and backend systems through RESTful API communication, relational databases, authentication, validation, and business logic implementation.
- Practiced end-to-end API development, JWT authentication, relational database management, exception handling, input validation, and CI/CD-driven deployment workflows with testing practices.
- Implemented CRUD operations, robust exception handling, and input validation logic across real-world application scenarios.

Full Stack Developer Intern — JupiterKings Technologies

- Developed and maintained scalable web application modules using Java, Spring Boot, React.js, and MySQL, contributing to production-grade features used by end users.
- Designed and implemented RESTful APIs enabling reliable, low-latency communication between frontend and backend microservices.
- Built responsive, reusable React.js UI components and integrated them with backend microservices to improve development efficiency.
- Participated in relational database design, SQL query optimization, and backend business logic implementation to improve application performance and data integrity.

PROJECTS

E-Commerce Application|GitHub: https://github.com/Rohithrgowda23/E-commerceshopsphere

Technologies: *Java, Spring Boot, Microservices, Apache Kafka, Redis, Spring Security (JWT, OAuth 2.0), MySQL, Docker*

- Designed an e-commerce platform using microservices architecture, decoupling product, user, cart, order, inventory, and authentication services while developing Java and Spring Boot microservices with REST APIs for e-commerce operations efficiently.
- Integrated Apache Kafka for event-driven communication between microservices for reliable order processing.
- Implemented Redis caching to reduce redundant database queries and improve application response time.
- Designed and managed MySQL databases with JPA/Hibernate for persistent storage and efficient CRUD operations.

AI Resume Analyser| GitHub: https://github.com/Rohithrgowda23/Ai-resume-analyser

Technologies: *Java, Spring Boot AI, Spring Security (JWT, OAuth 2.0), React.js, MySQL, Docker, LLM, Prompt Engineering*

- Architected a scalable AI-powered resume analysis platform using microservices, separating authentication, resume processing, AI analysis, reporting, and notification into independent, independently deployable services.
- Implemented secure authentication with Spring Security, JWT, Google OAuth 2.0, email OTP verification, and password reset flows.
- Built resume parsing and AI-driven analysis features that generate ATS compatibility scores, extract skills, and identify skill gaps.
- Containerized the full application stack with Docker to streamline deployment, scalability, and environment consistency.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science

Visvesvaraya Technological University (VTU) | Graduated: 2025 | CGPA: 7.1

CERTIFICATIONS

- Advanced Java Full Stack Development — Besant Technologies (E&ICT Academy)
- Full Stack Development — JupiterKings Technologies
